

My name is Kaila McCabe and I am a resident of New Haven, Connecticut.

Not only do I work at a school for children with Autism, I personally know families that have children with Autism. I think it is important that SB 1089 sections 23-29 be passed. Not only will this help families ensure the quality of help they get for their child, it will also help those family's that have financial limitations provide the care that their children need. I am wholeheartedly in favor of this bill and believe it should be passed as soon as possible. There are already 19 states that already have licensure, and with 458 CT residents currently certified it is time for us too to require licensure and ensure the quality of care the children in our state receive.
